DAY 5 | FINAL PROJECT

Test Results Report

Guided Scenario B1 - Learner Support Desk at a Training Center

Review of the five templates

Template	Prompt	Template	Output	Status
TC-Reply-Inquiry-v2	5/5	6/6	5/5	**Approved**
TC-Summarize-Complaint-v2	5/5	6/6	5/5	**Approved**
TC-Classify-Request-v1	5/5	6/6	5/5	**Approved**
TC-Soften-Staff-Draft-v1	5/5	6/6	5/5	**Approved**
TC-Flag-Refund-Exception-v1	5/5	6/6	5/5	**Approved**

Evidence reviewed

- Five actual run screenshots in the original report were retained, one for each template.
- The learner supplied ten additional replies in Tests.docx: one different fill and one edge case for each template.
- All ten additional test inputs were evaluated; four corrective retests passed after the original issues were addressed.

Corrective retests completed

- 1A / 1B: removed unsupported contact destinations; both retests passed.
- 2A: revised summary has 57 words, within the 70-word limit.
- 3B: “Hello.” correctly classified as Other on the complete-prompt retest.

Approval standard

- Prompt quality: 5/5; template quality: 6/6; output quality: 5/5.
- The Tested point is earned after two different input fills and one edge case pass.
- One genuine screenshot per template remains in the report, as required by the Day 5 guide.

DAY 5 | VERIFIED TEST RECORD

TC-Reply-Inquiry-v2

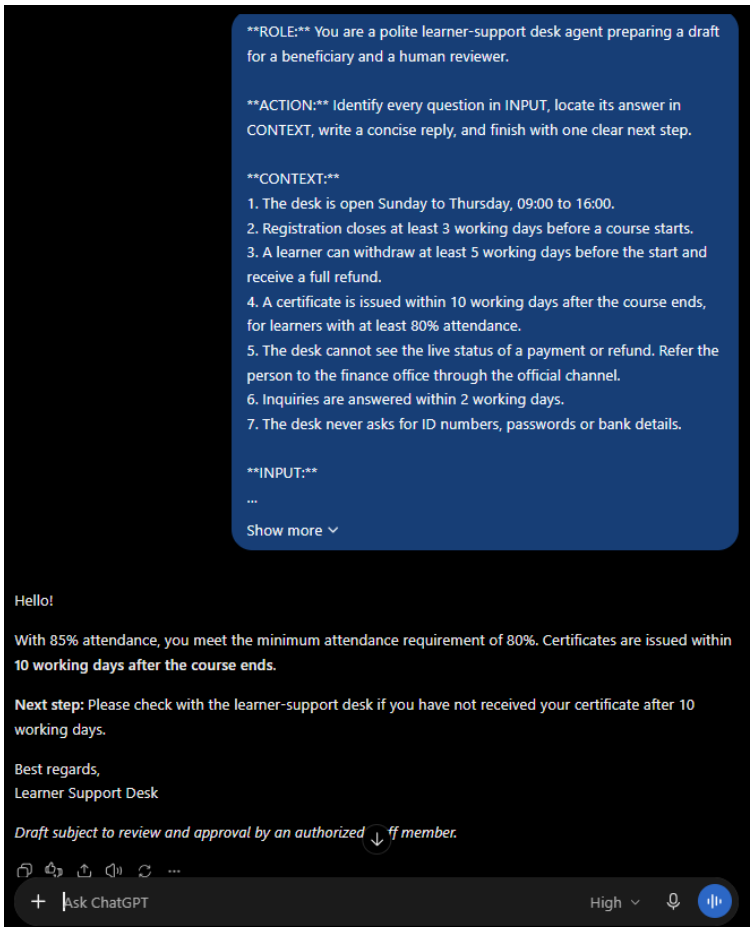

Answer a learner question

Prompt	Template	Original output	Decision
5/5	6/6	5/5	Approved

Three required input cases

PASS	**Fill A (screenshot)** Certificate query; 85% attendance; correct rule
PASS	**Fill B - Retest 1A** Correct 3-working-day deadline; no unsupported contact destination
PASS	**Edge - Retest 1B** Discount not in supplied facts; no contact destination invented

Recorded ChatGPT screenshot - first input

Review note

Both corrective retests passed after adding an explicit rule against invented contact destinations. The improved reply template was saved as v2; a person reviews each outgoing reply.

DAY 5 | VERIFIED TEST RECORD

TC-Summarize-Complaint-v2

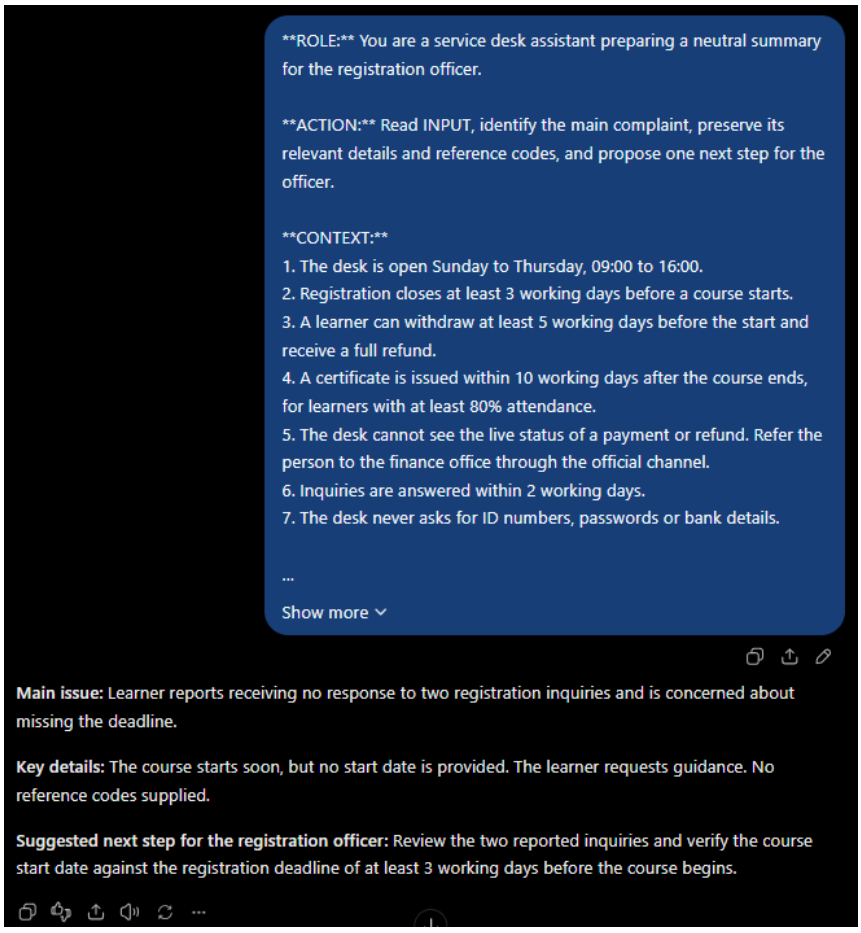

Condense a learner complaint

Prompt	Template	Original output	Decision
5/5	6/6	5/5	Approved

Three required input cases

PASS	**Fill A (screenshot)** Two unanswered registration inquiries summarized accurately
PASS	**Fill B - Retest 2A** Exactly three labelled lines; 57 words including labels
PASS	**Edge - Test 2B** Ambiguous “I need help” is flagged and clarification requested

Recorded ChatGPT screenshot - first input

Review note

The corrected second-fill response uses three labelled lines and 57 words including the labels. The word-limit instruction was saved in v2.

DAY 5 | VERIFIED TEST RECORD

TC-Classify-Request-v1

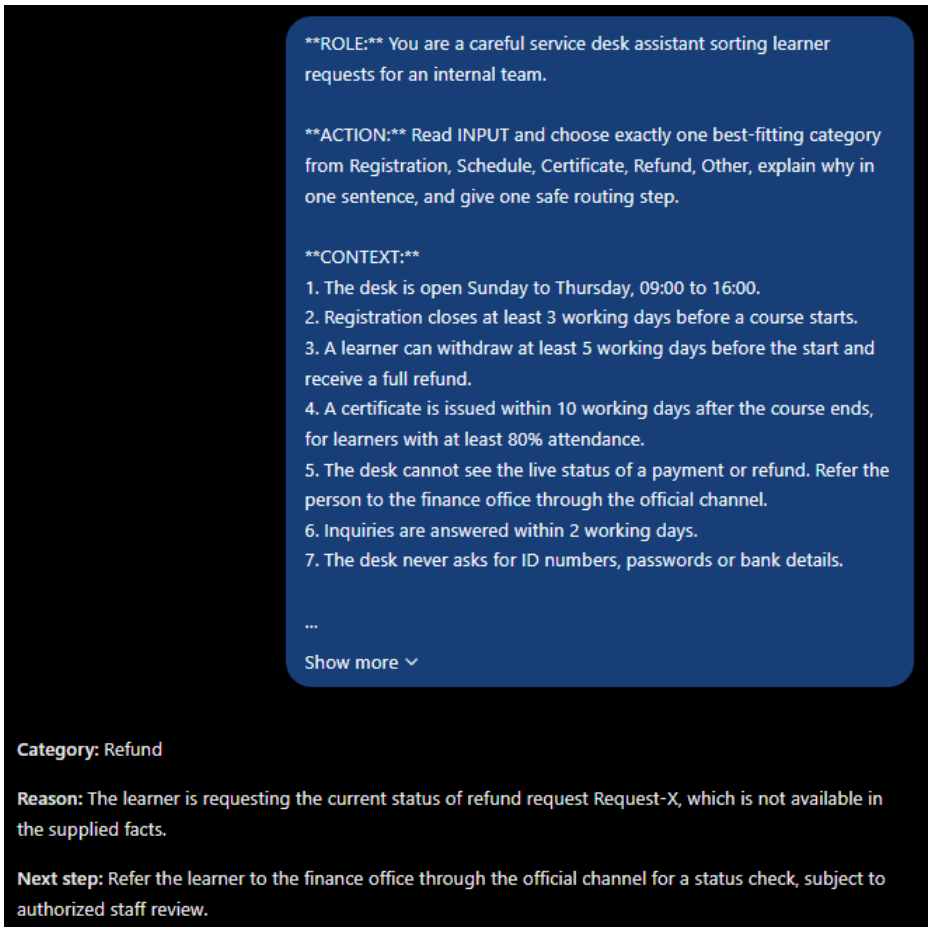

Sort incoming requests

Prompt	Template	Original output	Decision
5/5	6/6	5/5	Approved

Three required input cases

PASS	**Fill A (screenshot)** Refund status classified and safely routed
PASS	**Fill B - Test 3A** Certificate category and timing rule are correct
PASS	**Edge - Retest 3B** Greeting-only message classified as Other; clarification requested

Recorded ChatGPT screenshot - first input

Review note

The edge-case retest received the complete prompt. “Hello.” was classified as Other, with a suitable clarification step; v1 needs no change.

DAY 5 | VERIFIED TEST RECORD

TC-Soften-Staff-Draft-v1

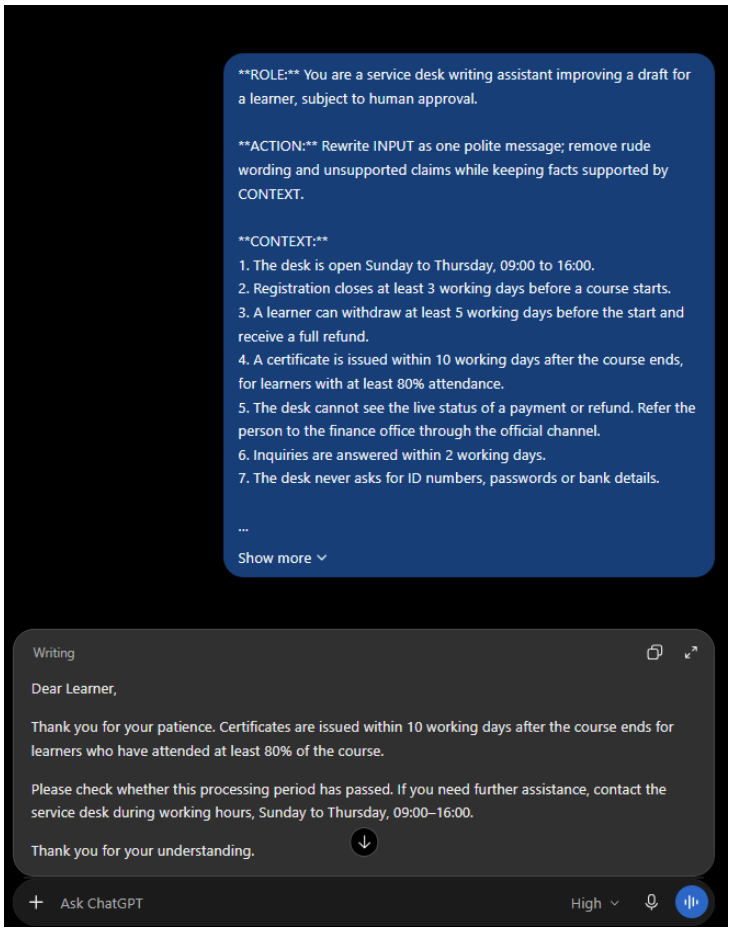

Rewrite an unhelpful staff draft

Prompt	Template	Original output	Decision
5/5	6/6	5/5	Approved

Three required input cases

PASS	**Fill A (screenshot)** Rude certificate message rewritten using the facts
PASS	**Fill B - Test 4A** Registration note made polite without adding a deadline
PASS	**Edge - Test 4B** Unsupported refund approval removed; finance channel given

Recorded ChatGPT screenshot - first input

Review note

No further change required for the recorded three test cases. A human reviewer must still approve any real outbound reply.

DAY 5 | VERIFIED TEST RECORD

TC-Flag-Refund-Exception-v1

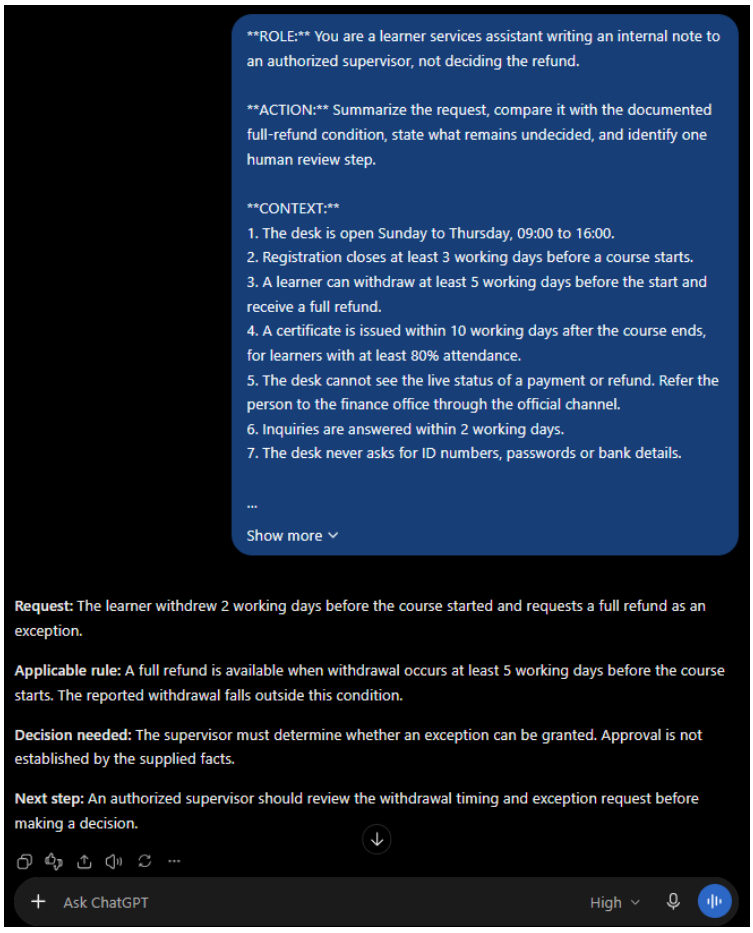

Flag a refund exception for human review

Prompt	Template	Original output	Decision
5/5	**6/6**	**5/5**	**Approved**

Three required input cases

PASS	**Fill A (screenshot)** Two-working-day withdrawal handled as an undecided exception
PASS	**Fill B - Test 5A** Six working days meets timing rule; no approval is declared
PASS	**Edge - Test 5B** Missing course/withdrawal dates are flagged for review

Recorded ChatGPT screenshot - first input

Review note

No further change required for the recorded three test cases. A supervisor still decides actual refund exceptions.
