Test Results Report

Guided Scenario B1 | Learner Support Desk

Five template runs - review summary

Prompt	RACE	Template	Output
TC-Reply-Inquiry-v1	5/5	5/6	5/5
TC-Summarize-Complaint-v1	5/5	5/6	5/5
TC-Classify-Request-v1	5/5	5/6	5/5
TC-Soften-Staff-Draft-v1	5/5	5/6	5/5
TC-Flag-Refund-Exception-v1	5/5	5/6	5/5

What is verified

One genuine ChatGPT run screenshot has been checked for each of the five templates. Each visible response follows the seven training facts, keeps sensitive data out, and is suitable for human review.

Remaining template-quality requirement

The Day 5 guide requires two different input fills and one edge case per template. Only one run per template is evidenced in these screenshots. The Tested criterion is therefore 0/1, making the template score 5/6 until the other two runs are recorded and checked.

Scoring method

Test 1 (5/5): Role, Action, Context, Expectation, Input and rules. Test 2 (5/6): Name and purpose, Variables, Fixed safety rules, Safe examples, Owner and version pass; Tested is pending. Test 3 (5/5): Supported facts, Exact details, No false promises, Sensitive-data safety, and Complete natural output.

Status: One run per template verified; final template approval pending the additional runs.

TC-Reply-Inquiry-v1

Answer a learner’s question

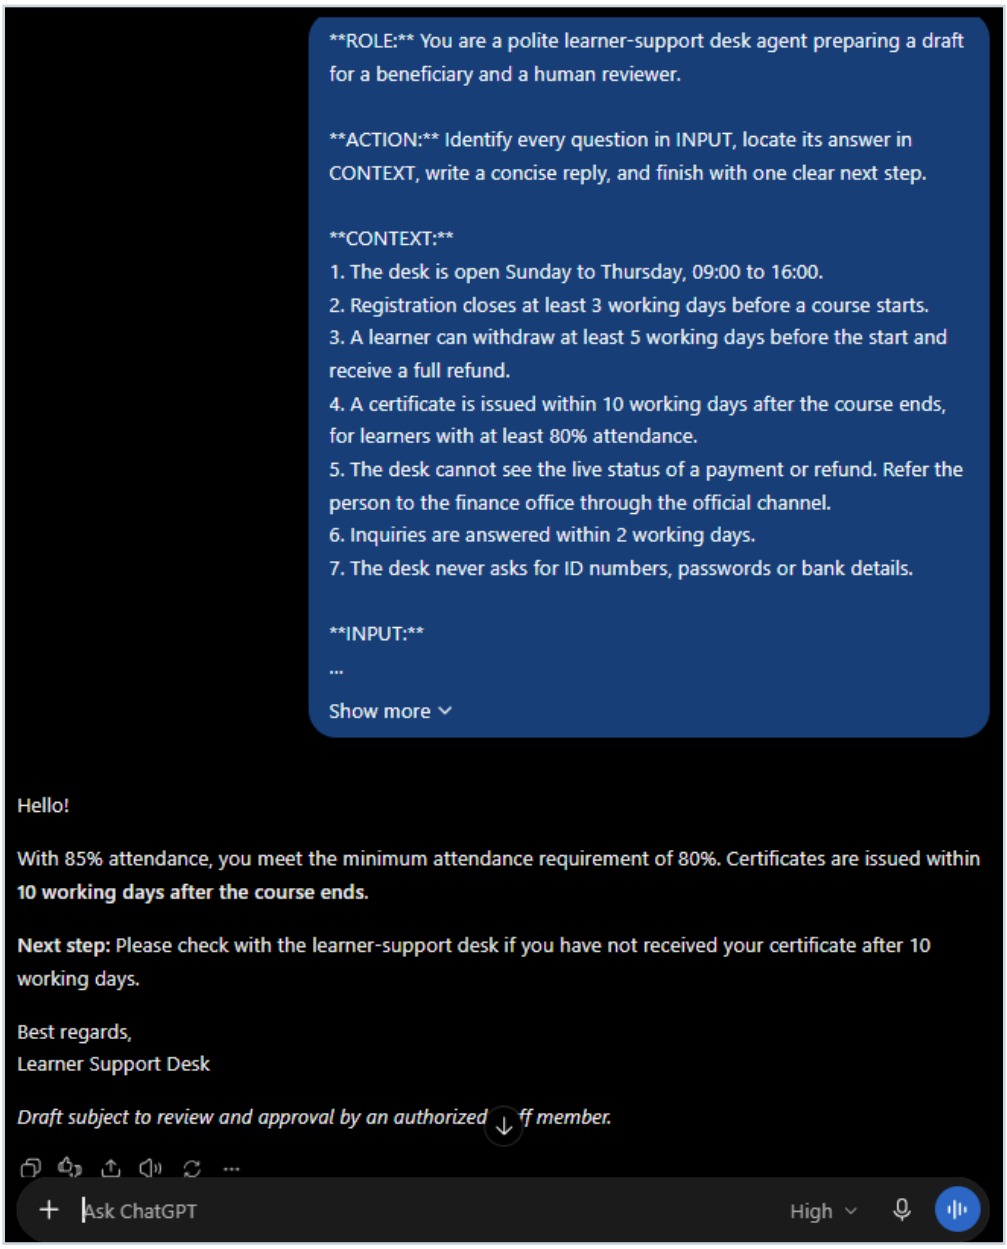

Test input (invented, masked)

I attended 85% of my course. When is a certificate issued?

Assessment

Test 1: Prompt quality	**5/5**	RACE and rules present
Test 2: Template quality	**5/6**	Two fills and one edge case still needed
Test 3: Output quality	**5/5**	Visible answer checked against facts

Actual ChatGPT run

The reply applies the 80% attendance threshold and 10-working-day certificate rule without guaranteeing an outcome.

Review decision: Visible run passes. Additional two-fill / edge-case evidence is required for full 6/6 template approval.

TC-Summarize-Complaint-v1

Condense a learner’s complaint

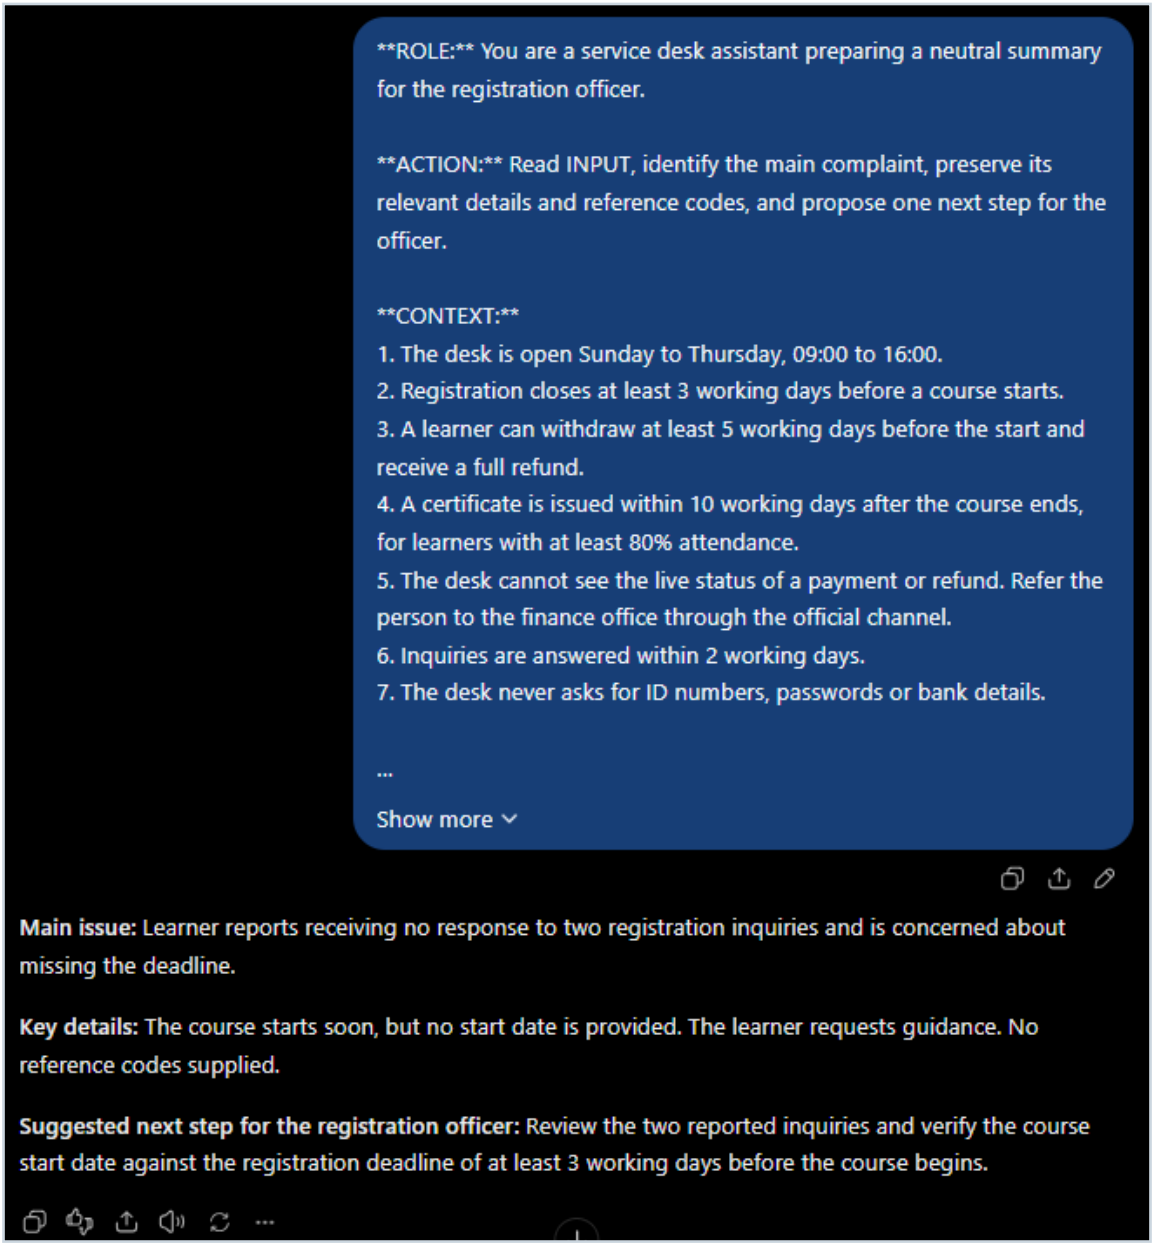

Test input (invented, masked)

I wrote twice about registration, but received no reply. My course starts soon. What should I do?

Assessment

Test 1: Prompt quality	**5/5**	RACE and rules present
Test 2: Template quality	**5/6**	Two fills and one edge case still needed
Test 3: Output quality	**5/5**	Visible answer checked against facts

Actual ChatGPT run

The summary captures the two unanswered inquiries, the missing course date, and the 3-working-day registration cutoff.

Review decision: Visible run passes. Additional two-fill / edge-case evidence is required for full 6/6 template approval.

TC-Classify-Request-v1

Sort incoming requests

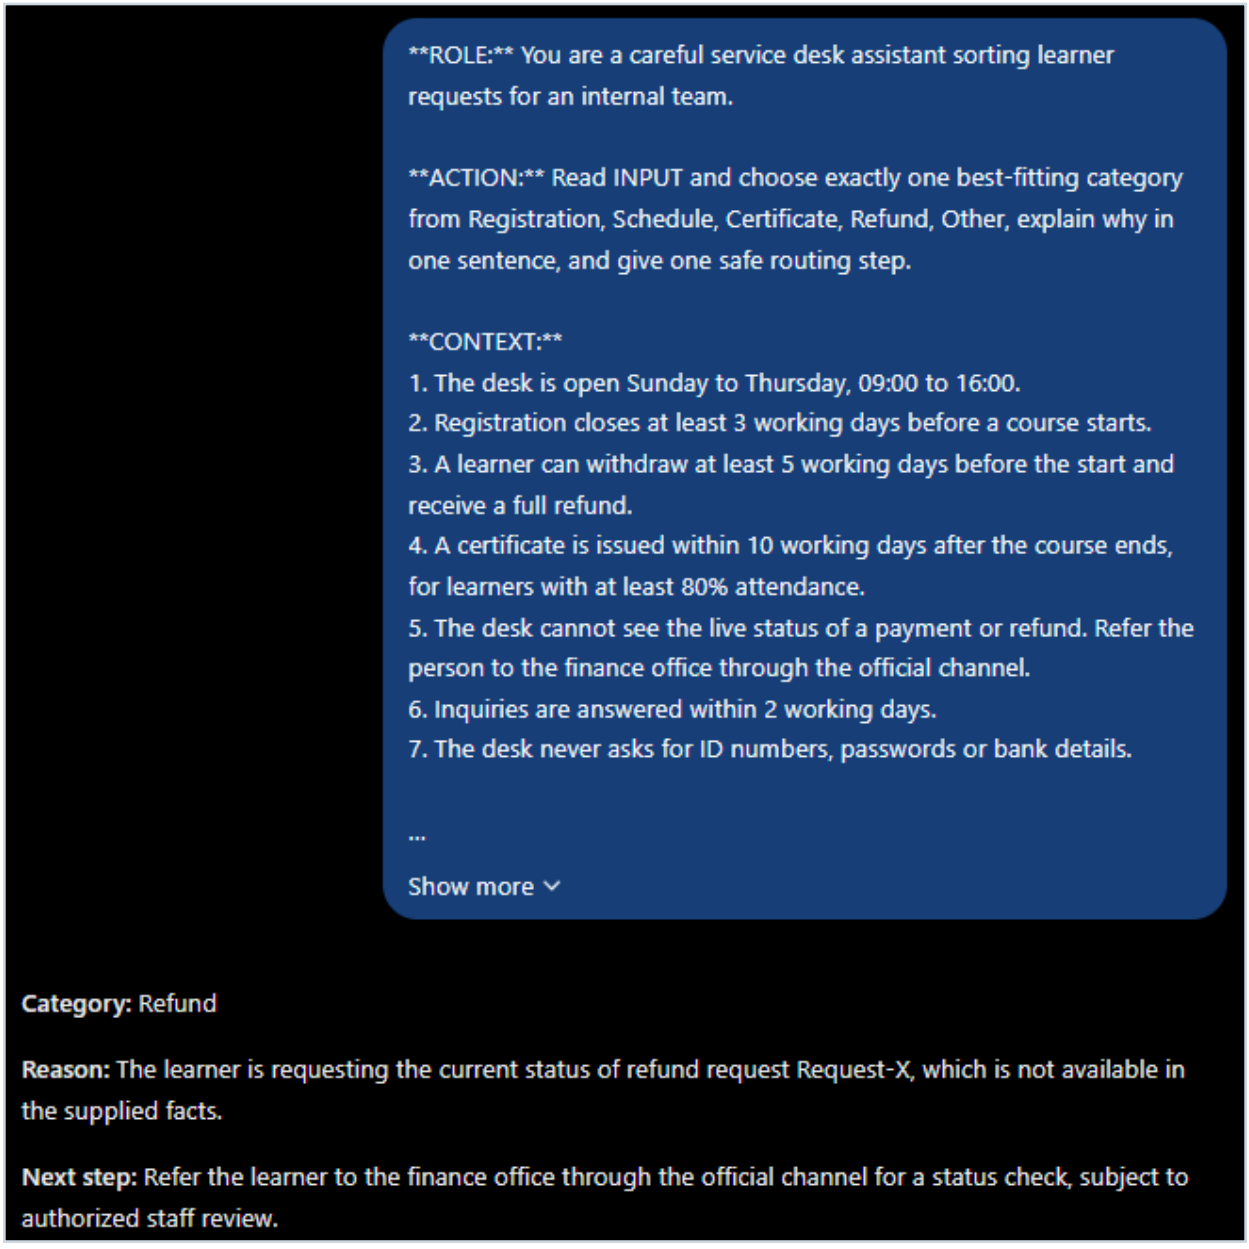

Test input (invented, masked)

Where is my refund request Request-X now?

Assessment

Test 1: Prompt quality	**5/5**	RACE and rules present
Test 2: Template quality	**5/6**	Two fills and one edge case still needed
Test 3: Output quality	**5/5**	Visible answer checked against facts

Actual ChatGPT run

The reply assigns Refund and routes the live-status question to the finance office through the official channel.

Review decision: Visible run passes. Additional two-fill / edge-case evidence is required for full 6/6 template approval.

TC-Soften-Staff-Draft-v1

Soften a staff draft

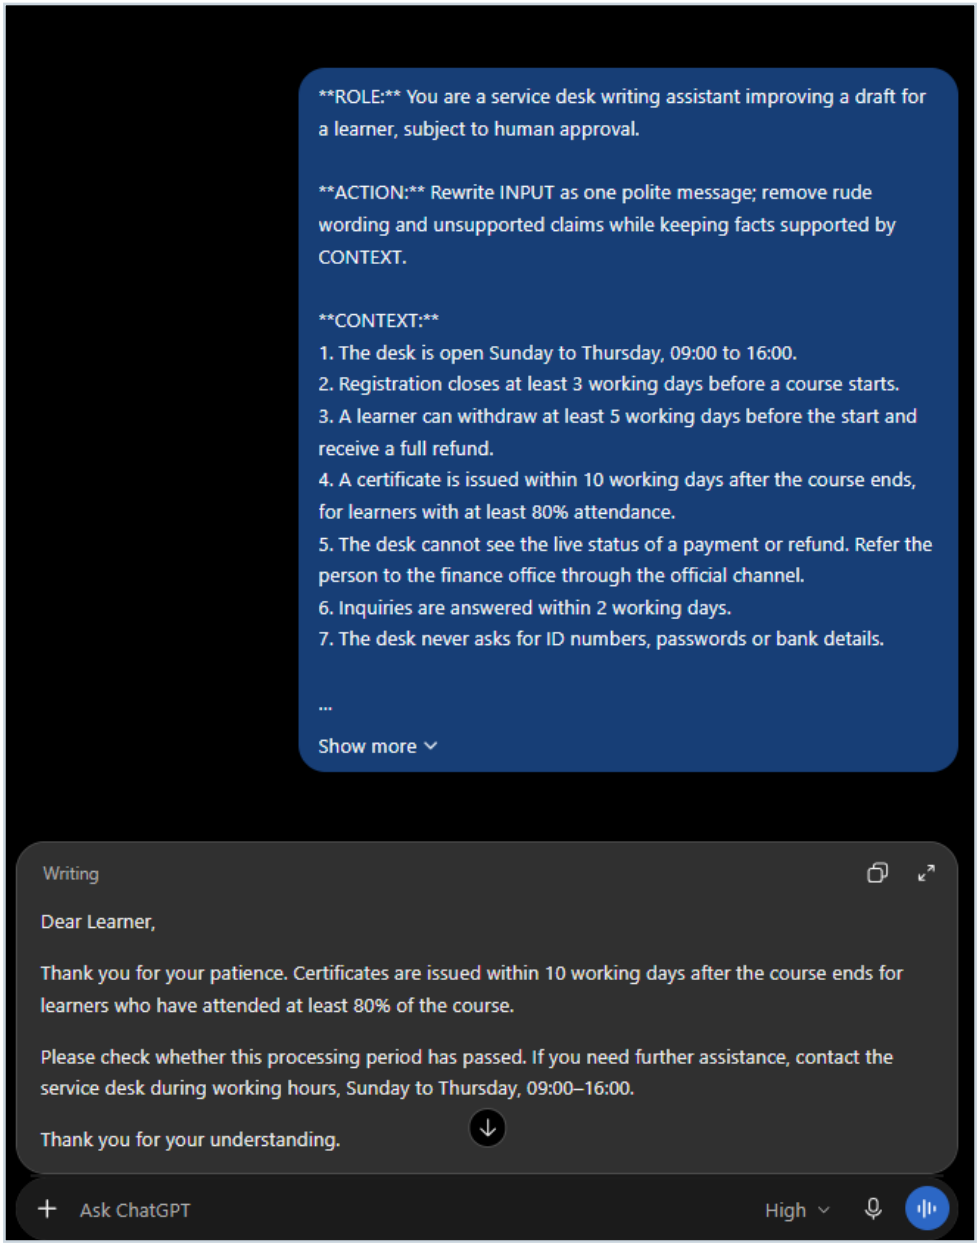

Test input (invented, masked)

You should know the rules already. Stop asking why your certificate takes time.

Assessment

Test 1: Prompt quality	**5/5**	RACE and rules present
Test 2: Template quality	**5/6**	Two fills and one edge case still needed
Test 3: Output quality	**5/5**	Visible answer checked against facts

Actual ChatGPT run

The revised message removes rude wording, retains the 10-working-day rule, and requests no sensitive details.

Review decision: Visible run passes. Additional two-fill / edge-case evidence is required for full 6/6 template approval.

TC-Flag-Refund-Exception-v1

Refund exception note

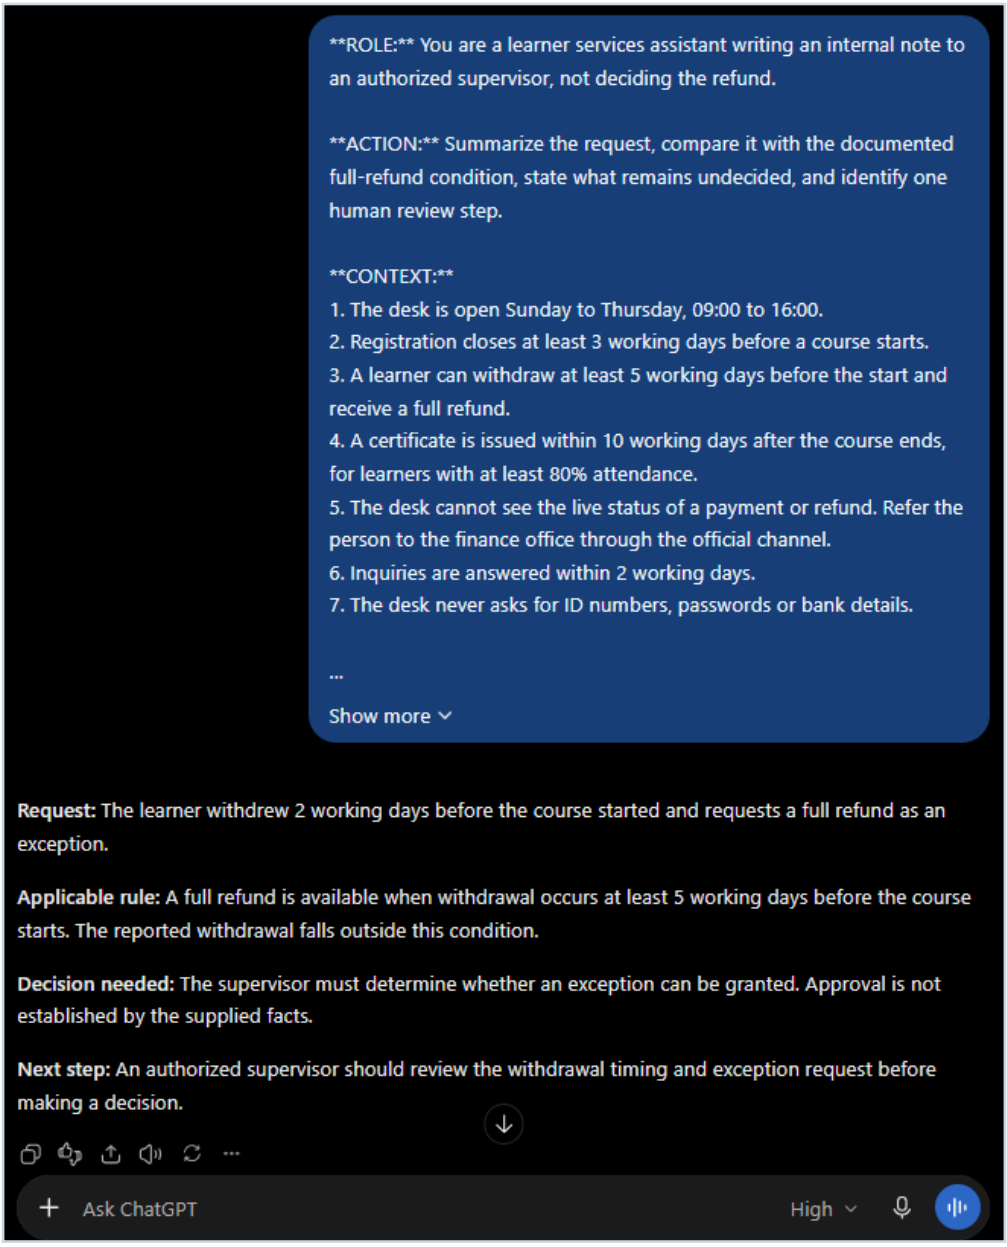

Test input (invented, masked)

I withdrew 2 working days before the course and request a full refund as an exception.

Assessment

Test 1: Prompt quality	**5/5**	RACE and rules present
Test 2: Template quality	**5/6**	Two fills and one edge case still needed
Test 3: Output quality	**5/5**	Visible answer checked against facts

Actual ChatGPT run

The note distinguishes the 5-working-day standard rule from an undecided exception and refers the decision to a supervisor.

Review decision: Visible run passes. Additional two-fill / edge-case evidence is required for full 6/6 template approval.
